

March 28, 2026

To Whom It May Concern,

Delaware Ducks Unlimited is proud to present the 22nd annual Greenwing Youth Conservation Festival!

We are happy to announce that on March 28, 2026, we will be hosting the annual Greenwing Conservation Festival. This event allows families to bond while also serving as a great educational experience. Each year we have seen hundreds in attendance with an increasingly larger number of attendees every year. In 2025, we recorded the highest attendance ever, with over 400 kids registered. We eagerly anticipate that the 2026 festival will be no different. However, none of this is possible without you and for that, I thank you deeply for your continued support.

The Greenwing program is run at the national level of Ducks Unlimited. For several years in a row, Delaware has hosted some of the biggest Greenwing youth events in the country. Every year, we have been awarded the distinguished Greenwing Honor Roll award, which would not be possible without your support. Even though the event itself comes with a high price tag, it is worth it as it directly impacts the education of the youth in attendance. We also use donations to expand the Greenwing program and make it even better for future generations of Greenwings. Without your support, we would not have the funding for this event. Depending on your level of contribution, you will have access to a host of benefits, including the knowledge that your donation makes all this possible. In addition, other Greenwing events include the Ed Montague inaugural shoot, which saw over 200 participants in 2025. It will take place March 29, 2026.

The 2026 Greenwing Conservation Festival is an event for youth to learn about wildlife management, wetland conservation, and safety education related to outdoor activities. Each participant not only gains valuable education on the day of the event, but is also registered in the Ducks Unlimited Greenwing Program for one year and continues to receive educational publications throughout the year. Today's youth are the conservationists of tomorrow!
